## Specification

Carb II Plywood Clad  
**P18**

Connect Cockpit & Bias Lighting  
**CBL**

Supply Your Own Hardware  
**BYH**

Privacy Film  
**DPF**

A single person, tech integrated video conferencing pod, crafted to provide an optimal and inclusive virtual meeting experience with excellent acoustic properties. User comfort has been considered with attributes such as lighting adjustability, an integrated fan for personalized temperature control, an adjustable height desk surface as well as adjustable monitor heights.

## Product features

USBC Charging point

Controls designed for easier differentiation and dexterity

Increased & adjustable airflow for longer VC use

Ergonomically adjustable table and separately adjustable monitor height

Backlit screen for optimal inclusive VC experience

USBC power lead with integral cable tidy

Auto Door opener inside & outside on ADA booth

Level access booths (ADA compliant)

## Other features

- Integral rear access chase for easy installation and flexible connection of all MEP components (sprinkler & electrics) and Day 2 access
- Access to rear chase from inside Residence Connect
- Acoustically designed construction for private video conferencing conversations to avoid distraction to surrounding occupants
- Seismically engineered with floor fixing positions in base frame
- Suitable for installing on raised-access floor, carpet or concrete floors
- 32"/813mm ADA Door clearances
