REMI LOUNGE

# Remi – Soft Revolution

BioPur® Foam is an innovative type of polyurethane foam that incorporates bio-based materials as a significant component of its formulation. This eco-friendly alternative to conventional foam is designed to offer similar, if not superior, performance characteristics while substantially reducing environmental impact.

#### Reduced Carbon Footprint

BioPur® foam production reduces carbon emissions by up to 75% compared to traditional polyurethane foams, offering a substantial environmental benefit.

#### Renewable Resource-Based

The foam is derived from renewable biological sources, such as plant-based materials, which minimises dependency on petroleum-based products and supports the sustainable use of natural resources.

#### Durability and Performance

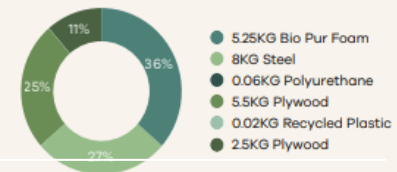

BioPur® foam does not compromise on performance. It exhibits high resilience, long-lasting durability, and excellent support properties, comparable to conventional foams.

#### Sustainable Manufacturing Processes

The production of BioPur® foam involves processes that consume less energy and produce fewer emissions compared to conventional foam manufacturing.

#### Clean Air

BioPur® foam is manufactured without the use of harmful chemicals, with low volatile organic compounds (VOCs) and trace formaldehyde, common in traditional foams, improving indoor air quality and overall health.

# RHINE

KEN REINHARD

The Rhine Collection is defined by its organic round forms, revolutionary horizontal expression, and unmatched reconfigurability.

Meticulously crafted by hand, Rhine transforms public spaces with boundless spatial freedom or creates intimate conversation zones.

Featuring chairs in static, swivel, and mobile options alongside integrated companion tables, this modular collection creates inviting compositions that bring warmth and refinement to a space.

*Every stage of Reinhard's design process is **done by hand**, from initial sketches to refined scale models and final prototypes.*

# Recap

---

- Engage the Spacestor team early in the process when exploring millwork and demountable wall options.
- Although we specialize in custom solutions, we also have an extensive selection of fully standard product offerings.
- The deliverables will vary based on the complexity of the solution, with a typical timeline ranging from 3 to 7 business days.

Spacestor®

The image shows a contemporary office lounge. In the foreground, there are several light-colored, rounded armchairs with blue and yellow cushions. A woman in an orange sweater is sitting on a dark blue sofa, looking at her phone. Behind her is a large, dark metal shelving unit with a grid pattern and arched tops, filled with various decorative items and plants. The wall behind the shelving unit is covered in lush green foliage. To the left, there are more plants and a colorful abstract artwork on the wall. The overall atmosphere is bright and modern.
