New, Unique + Innovative Acoustic Solutions

---

# Design Takes a Village....

Here are a few ways our [Design Studio](#) team can support you (at no extra cost!):

## PLANNING & PRICING

Together, we can walk through logistics and figure out “the why” behind your design.

We offer **design guidance and workshops** virtually or in person.  
Turf can support with **budget pricing** and **product comparisons**.  
We can work with your team to develop **standards programs**.  
We will be by your side to assist with the **project management**, too.

## DESIGNING

We can tag team every step of the design phase, including:

- Modifications to standard products
- Prototyping
- 2D CAD details & Custom Revit families
- Samples & Mockups
- Custom colors and print strikeouts

## BUILDING

If you're ready to build, we can help with **specification, ordering, installation, and field support**.  
That could look like:

Product certifications & 3-part spec templates  
Finish schedule support  
MEP & fixture coordination  
Installation guides & Pre-install verification  
Day two guidance

HIGH DESIGN MEETS DIGITAL FABRICATION™

# ANDALUSIA

---

**Andalusia Design** is a specialty ceilings and walls manufacturer based in Austin, Texas.

We combine parametric design with digital fabrication to deliver high-design systems with unparalleled flexibility, speed and efficiency.

Utilizing three flexible and integrated systems including slat walls, perforated metal, and etched panels, combined with a variety of materials such as plywood, MDF, aluminum, steel, PET felt, moss, and lighting, virtually any design idea can be realized.

# Three Systems

## Ceilings and Walls

### Contour Slats™

Plywood or MDF slats anchored into a back board and intelligently keyed for easy installation

### Perforate™

Laser-cut steel and aluminum panels anchored from standard ceiling grid or Unistrut, or to the wall with hanging rails. Hardware provided by Andalusia

### Etch™

MDF panels carved with CNC machine, typically painted with optional inlay of additional materials.

NOTE: Patterns and designs can be used across systems for greater design continuity.

# Materials and Finishes

## Contour Slats™

Plywood } Stained or  
MDF } Painted

## Etch™

| Moss     | Lighting |
| Acrylic  | COM      |

Etch designs can be standard or easily created to incorporate logos, branding, custom patterns or materials

# Your own combination

Integrated wall and ceiling system  
with slats, perforated metal, and  
integral lighting.

# WHY USE PARAMETRIC DESIGN?

# PARAMETRIC DESIGN + DIGITAL FABRICATION

CAD and CAM now can talk to each other!

Traditional fabrication methods require design drawings to be translated and drawn over again in a language that a machine understands (CAM). This can significantly affect schedule and design intent.

Integrated parametric design ensures that what you design can be built, and means your designs are able to be fed directly into the machine with no loss in time or modifications to design.

Parameters may include: material quality (hardness, thickness, bendability, sheet size), the tools needed to machine and finish material, maximum size of finished product (ie, can it fit in a truck or elevator), attachments, design constraints (how to elements fit within design and react to other elements), etc.

The marriage of parametric design and digital fabrication reduces barriers to creativity and allows for:

- Greater design flexibility
- Tighter fabrication tolerance
- Fewer billable hours spent
- Reduced time reinterpreting design or misinterpretation of intent
- Fast fabrication (4-6 weeks)
- Lower costs

## INSTALLATION INSTRUCTIONS

Note: You may refer to this legend for tile placement in subsequent steps. All positions are also marked in **black** sharpie on the back panels. The "D" keys refer to the tile color. Each "D" plaque will have a Small, Large, and Illuminated variety. Each tile key and size will be packaged together. Keep them in their original packaged groups for easy access and identification. Illuminated tiles have a unique position on the legend. Match the written number on the back of the tile to the black numbered positions below and to the locations marked in **blue** sharpie on the back panel.

| Overall Tile Quantity (From Imagery) |                |                |             |
|--------------------------------------|----------------|----------------|-------------|
|                                      | Small Quantity | Large Quantity | Illuminated |
| D1                                   | 21             | 10             | 2           |
| D2                                   | 45             | 10             | 5           |

Problem Solving

## INSTALLATION INSTRUCTIONS

### SYNOPSIS MILESTONE WALL

Note: The MDF panels backing the center sign are fragile due to thin sections. Handle with care while handling and mounting.

## INSTALLATION INSTRUCTIONS

### Steps:

1. Identify the Panel Alignment Rails (3). These will be temporarily fastened to the wall and used to align and mount the MDF back panels, before being removed again from the wall.

2. Refer to the purple outlines in the diagram below to identify and orient each panel. Each panel will also be labeled with blue painter's tape. Sections 2-5 contain thin, delicate areas where the sign will be installed—handle these with care.

## INSTALLATION INSTRUCTIONS

3. Position the Panel Alignment Rails on the wall at the desired installation height. Align the engraved centerline of the rails to the desired wall centerline. The rail centerline will later match up with Centerline Engraving 2 of Panel 4. Once placement is confirmed, secure the rails to the wall. Andalusia does not make official recommendations for rail mounting or hardware. The installer is responsible for ensuring a secure connection and proper leveling.

4. Position Panel 4 on the wall, aligning Centerline Engraving 2 with the corresponding mark on the Panel Alignment Rail.

## INSTALLATION INSTRUCTIONS

Note: You may refer to this legend for tile placement in subsequent steps. All positions are also marked in **black** sharpie on the back panels. The "D" keys refer to the tile color. Each "D" plaque will have a Small, Large, and Illuminated variety. Each tile key and size will be packaged together. Keep them in their original packaged groups for easy access and identification. Illuminated tiles have a unique position on the legend. Match the written number on the back of the tile to the black numbered positions below and to the locations marked in **blue** sharpie on the back panel.

|    | Overall Tile Quantity (From Imagery) |                |             | Total |
|----|--------------------------------------|----------------|-------------|-------|
|    | Small Quantity                       | Large Quantity | Illuminated |       |

# Working with us

## DESIGN PHASES

Services and Outputs:

- Collaborative and iterative design development, starting as early as concept design
- 3D parametric model development; ability to collaborate in Rhino and Revit or output to any standard CAD platform
- Renderings in Enscape, V-Ray
- Real-time pricing information during design iterations and design-for-budget / VE support
- Thorough product design proposals
- Physical material samples and color swatches
- Custom samples to demonstrate form / function of unique designs

Assistance with client-facing presentations, as desired

## POST-DESIGN / SPEC SUPPORT

Services and Outputs:

- Technical drawings – elevations, sections, details
- CSI MasterSpec document
- Comprehensive dimensions, thickness, weight information
- Final digital 3D model
- Final contractor net pricing
- Performance data, including ASTM E84 fire ratings, structural data, acoustic analysis, along with necessary supporting test data
- Sustainability certifications, EPD, HPD, Declare
- Detailed step-by-step installation instructions
- Maintenance and warranty information
- Reference part numbers and details
- Andalusia contact information

# Specifications Guides

Surface: 3D Model, Drawings, or just basic dimensions

Direction: Apply wall mounted panels to grey surfaces displayed in rendering.

# Jill Malek's Glass Murals Bring Natural Forms to the Built Environment

Skyline, Chicago-based studio known for pushing the boundaries of architectural glass, debuts their latest collaboration with New York designer Jill Malek at NeoCon 2025. Murals on Glass brings five of Malek's large-scale abstractions of the natural world to the clean, durable substrate of glass.

Known for bespoke dimensional wallcovering and unique textiles, Malek's designs are intended to soften the built environment with the sensitivity of nature. This and her new glass collection reflects research linking nature-based visuals to improved mood, attention, and emotional regulation, making Murals on Glass especially suited for human-centered spaces that prioritize neuroinclusive design.

"I am so excited to continue my collaboration with Skyline and offer some of my most popular mural designs as glass solutions." Jill Malek said in a recent interview, "This collection will be a beautiful intersection of color palettes inspired by dawn and dusk, translucent light, and soft patterning on large scale glass."

*Murals on Glass* brings five of Jill Malek's large-scale abstractions of the natural world to the clean, durable substrate of architectural glass.
