Remi – Soft Revolution

BioPur® Foam is an innovative type of polyurethane foam that incorporates bio-based materials as a significant component of its formulation. This eco-friendly alternative to conventional foam is designed to offer similar, if not superior, performance characteristics while substantially reducing environmental impact.

Reduced Carbon Footprint

BioPur® foam production reduces carbon emissions by up to 75% compared to traditional polyurethane foams, offering a substantial environmental benefit.

Renewable Resource-Based

The foam is derived from renewable biological sources, such as plant-based materials, which minimises dependency on petroleum-based products and supports the sustainable use of natural resources.

Durability and Performance

BioPur® foam does not compromise on performance. It exhibits high resilience, long-lasting durability, and excellent support properties, comparable to conventional foams.

Sustainable Manufacturing Processes

The production of BioPur® foam involves processes that consume less energy and produce fewer emissions compared to conventional foam manufacturing.

Clean Air

BioPur® foam is manufactured without the use of harmful chemicals, with low volatile organic compounds (VOCs) and trace formaldehyde, common in traditional foams, improving indoor air quality and overall health.

PAINT BY NUMBERS

BY LIAM LEE

HBF
TEXTILES

LIAM LEE

@studio_liamlee

Born and raised in New York City, Liam Lee is a Brooklyn-based artist and designer

Inspired by the dissolution of boundaries between interior and exterior spaces, as well as between structured objects and the natural environment.

Exhibited work in New York and Shanghai, including shows with R & Company, Objective Gallery, SFMOMA, and the Cooper Hewitt Smithsonian Design Museum.

Named a finalist for the 2023 Loewe Craft Prize and recognized by Wallpaper*, Dwell, and Architectural Digest as a leading emerging designer.

MAGIC EYE 1116

Drawing inspiration from the computer-generated graphics that captivated Lee in the '90s, this pattern brings a mesmerizing energy to upholstery, tracing its lineage from the Jacquard loom and its punch card to today's digitally driven weaving technologies. The result is a textile that feels alive, and its lichen-like motif is a testament to Lee's fascination with how binary code can conjure something organic and full of depth. Available in seven dappled colorways with names like Argonaut and Water Lilies, Magic Eye is woven from 78% post-consumer recycled polyester and is also suitable for wrapped paneling.

DESIGNER	Liam Lee
PATTERN	1116
COLORWAYS	7
APPLICATION	Upholstery, Wrapped Panel
CONTENT	78% Post-Consumer Recycled Polyester, 22% Nylon
WIDTH	54"
REPEAT	36 1/4" V x 27 3/4" H
FINISH	Non PFAS Water Repellant
BACKING	Acrylic
ABRASION	100,000 Double Rubs (Wyzenbeek)
ORIGIN	United States
FLAME RESISTANCE	California TB 117-2013 Section 1 (Pass), ASTM-e84 (Unadhered)
MAINTENANCE	WS: Clean with upholstery shampoo or mild dry-cleaning solvent.
SUSTAINABILITY	Third Party Certified, SCS Indoor Advantage™ Gold. Meets BIFMA 7.4.4: PFAS, FR, PVC and Antimicrobial Free. Meets LBC Red List Free.
PRICE GRADE	\$63.00/Yard HBF Grade J
NOTES	Bleach Cleanable (1:4 Ratio)

POINTILLIST 1115

Taking its cue from the fin de siècle artistic movement, Pointillist integrates points of color through hand-selected bouclé yarns to produce dynamic color fields that are luminous and cohesive. The 10 colorways span a striking range, from the cerulean-lit *Proteus*, to the earthy browns and blues of *Noh*, and the charmingly retro pink and chartreuse of *Studmuffin*. Pointillist is approved for both indoor and outdoor use, pairing its visual softness with considered durability.

DESIGNER	Liam Lee

GRIDWORK 1108

At first glance, Gridwork's simple construction communicates a handcrafted quality. While the textile itself echoes the simple warp and weft of canvas, textured yarns and piece-dyed contrasting color combinations weave together a surface that softens out from afar and yet, up close, reveals a layered, artistic depth. Made from 95% post-consumer recycled polyester, each of the 13 colorways is designed to impart two things at once: sophistication and surprise. Take Tantrum, Lee's exclusive signature vibrant pink, or the subtle play of light and dark in Nocturne, it's this balance that gives Gridwork a subtle tension.

DESIGNER	Liam Lee

TEXTILES

IMPASTO 1117

IMPASTO 1117

Deriving its name from the thick application of paint to build depth, Impasto, a textured velvet, adds a dynamic, light-sensitive, and lively curation to this collection. Its undulating, woven structure evokes the organic patterns that are integral to Lee's work: natural textures displayed in woven pile. Offered in 5 distinctive colorways such as Oberon, an inky mix of purple and brown named for the king of the fairies in A Midsummer Night's Dream, and Wilde, a rich, warm forest green that is as refined as its namesake (Oscar), Impasto is defined by the mercurial, in-between and slightly off-kilter hues that resist easy classification.

DESIGNER	Liam Lee
PATTERN	1117
COLORWAYS	5
APPLICATION	Upholstery
CONTENT	52% Polyester, 44.2% Viscose, 3.8% Cotton
